**"New Wyncs Software a winner for HighSchoolSports.Net "  
10,000 Sports Schedules sent to Handhelds by way of Wyncs in only one Week!**

September 2002: Midland Park, NJ: Mr. Adolph Santorine, Jr., CEO of the hugely popular HighSchoolSports.Net web site spoke today about the surprisingly effective and quick results experienced after adding the new Wyncs Web-Sync Software to his company's site. " When we put the new Wyncs software onto our web site, it was intended as a convenience for parents, allowing them to quickly and easily add their childrens sports schedules directly into Handhelds and Palm Pilots." said Santorine. "What absolutely impressed and astonished us was that more than 10,000 'Wyncs' were sent to visitor's Handhelds in the first week alone."

When the new Wyncs brainchild was first revealed to Mr.Santorine, he saw the potential of this exciting new software as an adjunct to the already successful HighSchoolSports.net system. Realizing that the Wyncs software would enable parents, staff and students to easily sync important data directly into PDA's, Mr.Santorine was enthusiastic about trying it. "I knew this would work, yet had no idea it would reach such heightened proportions so quickly. Visitors are now able to quickly sync sports schedules using the innovative 'grab-and go' concept," said Mr. Santorine, "which can then be viewed at your convenience. Wyncs makes it easy for you to 'grab' information, positioning it where they need it most, be it in their Palm Pilots or Outlook."

The HighSchoolSports.Net site is a division of a successful publishing company that has been providing scheduling solutions to High School Athletic Directors since 1964. When your school's Athletic Director uses our software, they can dynamically update their schedule on HighSchoolSports.Net with just a click of the mouse. HighSchoolSports.Net, has become an indispensable communication tool for Schools nationwide. Students, parents and the press can quickly and easily log onto HighSchoolSports.Net and get the latest information on the Schedule most important to them..

(continued)

"Adding Wyncs to our already successful system, made the site even more efficient and useful," said Mr. Santorine.

HighSchoolSports.Net has over 5 million Athletic events online.

Jeff Weaver, Marketing Director of Eros Technology, the parent company of Wyncs Software Utility, stated, "We are delighted at the incoming success reports from major corporations and web developers around the world. We knew we had created something special but are now more convinced than ever that this might very well be one of the most efficient uses of technology in recent years. Users of personal organization software and PDA's will be thrilled by this type of efficiency."
